PROFILE

Full-stack Software Engineer with 6+ years of experience building scalable, secure, and high-performance applications using .NET Core, Angular, and modern Microsoft technologies. Strong in back-end API architecture, database optimization, cloud readiness, and delivering clean, maintainable code. Collaborative team player focused on quality, performance, and user-centric solutions.

EDUCATION

GTU (2019)

MCA

L J Institute of Computer Application

SKILLS

- C#
- .NET Core
- Web API
- EF Core
- Authentication
- LINQ
- Angular
- JavaScript
- TypeScript
- HTML
- CSS
- Bootstrap
- SQL Server
- MySQL
- PostgreSQL

TOOLS & PLATFORMS

- Git
- Postman
- Swagger
- Azure

EXPERIENCE

MobMaxime Inc

Sr. Software Engineer | May 2019 – Oct 2025 | Ahmedabad

Developed scalable back-end architectures using .NET Core, EF Core, and SQL Server. Built RESTful APIs integrated with Angular and mobile apps with high performance and clean contracts.

Optimized SQL queries, reduced API response time, and improved system reliability. Led API and front-end integration, ensuring seamless communication and faster delivery.

PROJECTS

Fitrepublik — Sports & Gym Platform

Role: Sr. Software Engineer

- Developed back-end services in .NET Core for user management, memberships, workout schedules, and real-time class bookings.
- Built secure and scalable RESTful APIs integrated with Angular front-end for smooth web and mobile experiences.
- Implemented role-based access control and session management for members, trainers, and administrators.
- Collaborated with front-end teams to structure and optimize API contracts for efficient data handling and responsive dashboards.

Adspare — Inventory Management

Role: Software Engineer

- Designed and developed back-end modules in .NET Core for spare part listings, inventory management, and order workflows.
- Built RESTful APIs for part search, supplier integration, and dynamic pricing with real-time performance and reliability.
- Collaborated with clients to gather requirements and translate them into scalable and maintainable back-end solutions.

LDH Agro — Agriculture eCommerce

Role: Jr. Software Engineer

- Developed back-end services in .NET Core for managing product listing, pricing, stock control, and category organization.
- Built secure and scalable APIs enabling real-time product browsing and ordering across regions and devices..
- Designed admin-controlled modules to manage product data with restricted access, ensuring platform consistency, data accuracy, and secure operations.

PharmaTech Expo — Event Platform

Role: Jr. Software Engineer

- Developed a dynamic and responsive .NET Core MVC website for an international pharmaceutical exhibition with exhibitor profiles, schedules, and visitor registration.
- Built a flexible content management system enabling clients to update banners, speaker profiles, floor plans, and sponsor details without developer support.
- Added inquiry forms with automated email notification.
